EDUCATION

Bharati Vidyapeeth College Of Engineering, Pune

Bachelor of Technology • Computer Science

July 2020 - May 2024

SKILLS

Programming Languages: Java, C++, Dart, SQL, Rust

Web Tools & Frameworks: Spring Boot, REST API, Spring Security, JWT, JPA/Hibernate, PostgreSQL, Kafka, Redis, Docker, Spring Cloud Gateway, Flutter, Flutterflow, Firebase, SQL, Postman, Git

Computer Fundamentals: Object Oriented Programming, Operating System, Computer Networking, DBMS, System Design

EXPERIENCE

Microland

Sep 2024 – Present

Software Engineer 1

- Developed and maintained backend services for the Microland One app, utilizing Spring Boot, MySQL, and REST APIs, improving system efficiency by 30%.
- Optimized database queries and indexing strategies, reducing query response times by 33%.
- Debugged and troubleshooted critical backend issues, analyzing logs and fixing performance bottlenecks, reducing system downtime by 35%.
- Implemented version control best practices using Git, streamlining collaboration, reducing deployment errors by 25%, and ensuring 99.9% uptime.
- Exposure: Spring Boot, RESTful APIs, MySQL, Debugging, Git

DynaPeak Systems

July 2023 – Aug 2024

Software Engineer Intern

- Revamped state management using GetX in Flutter and FlutterFlow, reducing app load times by 40% and enhancing performance by 25%.
- Conducted comprehensive testing using Firebase tools, reducing bug occurrence by 40% and improving app stability.
- Integrated REST APIs with Firebase, ensuring seamless data flow and improving user interaction.
- Devised and deployed over 9 features per sprint, enhancing efficiency by 20% while ensuring smooth UI/UX.
- Exposure: Flutter, REST API, Flutterflow, Firebase, GetX

PROJECTS

E-Notes API Service

Oct 2025 – Dec 2025

- Developed RESTful API with Spring Boot handling 50+ daily operations, implementing JWT authentication with Spring Security, BCrypt encryption, and role-based access control across 20+ secured endpoints
- Designed MySQL database schema with JPA/Hibernate using @ManyToOne/@OneToMany mappings, achieving 40% faster query performance through optimized JPQL queries and indexed lookups
- Integrated Swagger/OpenAPI for API documentation, configured centralized exception handling with @ControllerAdvice, and implemented SLF4J logging monitoring 100+ daily API calls
- Exposure: Spring Boot, Spring Security, JWT, JPA/Hibernate, Spring Data JPA Specifications, Bean Validation

Cloud-Native E-Commerce Platform

Nov 2024-Nov 2024

- Formulated and deployed 5+ microservices using Spring Boot and Kafka, efficiently handling 1K+ transactions/day with an event-driven architecture.
- Subsumed API Gateway (Spring Cloud Gateway), ensuring 99.99% uptime with secure routing and traffic management.
- Refined Redis caching, improving query performance by 70%, and containerized services with Docker for auto-scaling and fault tolerance.
- Exposure: Spring Boot, Spring Cloud Gateway, Kafka, REST API

ACHIEVEMENTS / EXTRACURRICULAR

- Solved more than 350+ DSA problem on leetcode Handle : [AnishJaiswal](#)
- Codeforces Round 917 : Global Rank- 713
- Secured top 5 in Smart India Hackathon 2024 for developing an Blockchain Based legal Doc Aggregation syst.
