

Anish Jaiswal

Bangalore, Karnataka

📞 8085480188 ✉ anishjaiswal381@gmail.com 🔗 LinkedIn 🐙 GitHub 🚀 LeetCode

SKILLS

- **Languages:** Java, C++, SQL
- **Backend & Frameworks:** Spring Boot, Spring Security, JPA/Hibernate, REST API, Microservices, Spring Cloud Gateway, Kafka, Redis, JWT
- **AI/ML & Data:** LangChain, LangChain4j, RAG, DeepLearning4j, Vector Databases (Chroma, FAISS), OpenAI API
- **Databases:** PostgreSQL, MySQL, Firebase
- **DevOps & Cloud:** Docker, CI/CD, Git, Maven, Postman, AWS (EC2, S3), Linux
- **Testing & Quality:** JUnit, Mockito, Test-Driven Development, Swagger/OpenAPI
- **Core Concepts:** DSA, System Design, OOP, DBMS, Computer Networks, Agile/Scrum

EXPERIENCE

Microland

Software Engineer

Sep 2024 – Present

Bangalore, India

- Architected REST API with Spring Boot deployed on AWS EC2 to poll network devices via SNMP, store metrics in MySQL with JPA, and trigger alerts based on threshold rules—eliminated 50% of manual monitoring tasks
- Automated compliance reporting for 320+ routers and switches using Spring Boot scheduled jobs, eliminating 8 hours/week of manual work and enabling proactive detection of BGP failures and VLAN misconfigurations
- Developed RAG-based spare parts finder using LangChain and FAISS to semantically search CMDB inventory, auto-recommending nearby replacement devices during failures—cut replacement time by 65% and eliminated \$15K in expedited shipping costs annually
- Implemented caching layer with Spring's @Cacheable and Redis to reduce database hits by 60%, optimized slow queries using EXPLAIN and strategic indexing, validated with JUnit integration tests
- Deployed monitoring system using Docker containers orchestrated with shell scripts, implementing health checks and auto-restart mechanisms—achieved 99.9% service availability with zero downtime deployments
- **Tech Stack:** Spring Boot, Spring Data JPA, Spring Security, MySQL, Redis, Docker, Git, JWT, Quartz Scheduler, JUnit, AWS EC2

PROJECTS

E-Notes API Service

Sep 2025 – Oct 2025

- Developed RESTful API with Spring Boot handling 50+ daily operations, implementing JWT authentication with Spring Security, BCrypt encryption, and role-based access control across 20+ secured endpoints
- Designed MySQL database schema with JPA/Hibernate using @ManyToOne/@OneToMany mappings, achieving 40% faster query performance through optimized JPQL queries and indexed lookups
- Integrated Swagger/OpenAPI for API documentation, configured centralized exception handling with @ControllerAdvice, and implemented SLF4J logging monitoring 100+ daily API calls
- **Tech Stack:** Spring Boot, Spring Security, JWT, JPA/Hibernate, MySQL, Swagger, JUnit, Mockito, Maven

NetOps Monitor - AI-Powered Network Operations Platform

Jul 2025 – Aug 2025

- Built microservices platform with 3 Spring Boot services handling device monitoring and incident management—supports 1,000+ devices with i80ms response time
- Implemented LSTM anomaly detection using DeepLearning4j on 30 days of metrics achieving 87% accuracy—reduced false positives by 40% and auto-created incidents for predicted failures
- Developed AI chatbot with LangChain4j and GPT-4 for natural language queries and automated troubleshooting, integrated RAG with Chroma vector DB storing 500+ resolutions—cut MTTR by 35%
- **Tech Stack:** Spring Boot, DeepLearning4j, LangChain4j, OpenAI API, Chroma, MySQL, Redis, Docker, GitHub Actions

ACHIEVEMENTS / EXTRACURRICULAR

- Solved 350+ DSA problems on LeetCode (Top 5%)
- Codeforces Round 917: Global Rank 713
- Secured Top 5 in Smart India Hackathon 2024 for developing a Blockchain-based legal document aggregation system

EDUCATION

Bharati Vidyapeeth College Of Engineering, Pune

Bachelor of Technology • Computer Science • CGPA: 9.2/10

July 2020 - May 2024
